WARNINGS:

Increases blood clotting time and the concentration of blood calcium, causing haemorrhage.
Harmful to terrestrial vertebrates.

PRECAUTIONS:

Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product.

DIRECTIONS FOR USE

Single Feed Bait Stations: Double Tap® Pellet Bait is a single-feed possum and rat bait. Bait must only be used in covered bait stations which restrict accessibility to non-target terrestrial vertebrates & which prevent weathering of the bait. Bait stations located below 200mm must restrict accessibility to children and all possum bait stations must be located 200mm above the ground.

Prefeeding:

Prefeeding is not required

NOTIFICATIONS

For Professionals Users notice must be given to the occupiers & as far as practicable, owners of land dwellings or buildings within the vicinity of the bait station site of the proposed application of the bait.

For Use in Bush & Forest Environments

Double Tap® Pellet Bait is a single-feed possum and rat bait and it is recommended to place between 500g – 1kg of bait in each bait station. Bait should be checked and replenished where necessary in bait stations after 6 to 10 days and bait stations left in place for about two and half months to manage the control of all resident and immigrant possums and rats.

Instructions concerning bait station loading, spacing, checking & replenishment
The following instructions are provided as guidelines only. They are not intended to be a substitute for the professional judgement of the user. The user should apply their own judgement to the local environment & operational plan. Factors to consider & evaluate when applying these guidelines include: weather conditions, pest density, bait station accessibility, replenishment (if any) & topography of the land. Replenishments should continue until bait take stops.

If the operation is targeting possums & rats, the guidelines applications to rats should form the basis of the operational plan.

FOR USE IN BUSH & FOREST ENVIRONMENTS

	POSSUMS	RATS
Bait Station Placement	150m spacing 150 gm – 250 gm	50m spacing 100 gm – 250 gm
Initial Bait Station Loading all sizes	Between 6 to 10 days	Between 6 to 10 days
Checking the replenishment	Between 6 to 10 days	Between 6 to 10 days
Replenishment Bait Station Loading	70 gm – 250 gm	70 gm – 250 gm

FOR USE IN BUSH & FOREST PASTURE SETTINGS

	POSSUMS	RATS
Bait Station Placement	150m spacing 250 gm – 1000 gm	50m spacing 100 gm – 250 gm
Initial Bait Station Loading all sizes	Between 6 to 10 days	Between 6 to 10 days
Checking the replenishment	Between 6 to 10 days	Between 6 to 10 days
Replenishment Bait Station Loading	70 gm – 250 gm	70 gm – 250 gm

FOR ORCHARDS, LIFESTYLE BLOCKS & RURAL SETTINGS

	POSSUMS	RATS
Bait Station Placement	4 bait stations per hectare 100 gm – 200 gm	4 bait stations per hectare 100 gm – 200 gm
Initial Bait Station Loading all sizes	Between 6 to 10 days	Between 6 to 10 days
Checking the replenishment	Between 6 to 10 days	Between 6 to 10 days

FOR INDUSTRIAL & DOMESTIC USE

	POSSUMS	RATS
Bait Station Placement	Locate bait stations under eaves of possums wells or others and in dark, sheltered areas signs of possum activity Spacing 5-10m	Locate Bait Stations under cover, along walls or others and in dark, sheltered areas signs of rat activity Spacing 5-10m
Initial Bait Station Loading	6 gm 12 gm 25 gm	6 – 10 pellets per Bait Station 3 – 5 pellets per Bait Station 1 – 2 pellets per Bait Station
Checking the replenishment	Between 6 to 10 days	Between 6 to 10 days
Replenishment Bait Station Loading	6 gm 12 gm 25 gm	6 – 10 pellets per Bait Station 3 – 5 pellets per Bait Station 1 – 2 pellets per Bait Station

SYMPTOMS OF POISONING:

Early symptoms are loss of appetite, lethargy, dehydration and headache. This is followed by muscle weakness, constipation and haemorrhage.

FIRST AID:

In the event of poisoning or suspected poisoning act immediately. Call a doctor or take to nearest hospital without delay. Show this label or Safety Data Sheet. For further advice contact National Poisons Centre (0800 POISON (0800 764 766)). For animals, consult a veterinarian immediately.

DOMESTIC ANIMALS & LIVESTOCK:

It is important to prevent access to bait by domestic animals and pets. All toxic bait must be removed on completion of the control operation. Owners of pets and animals in the immediate vicinity should be notified of potential risk. Also refer to Notifications.

STORAGE:

Bait should be stored in a cool dry secure place away from feed or foodstuffs. Keep containers closed when not in use. Do not store near children or domestic animals. Any product that after the expiry date shown on the container should be disposed of according to the label directions.

SPILLAGE:

In the event of a spill, isolate the spill area and take all practical steps to manage any harmful effects. Scoop up spilled bait into secure containers. Undamaged bait may be re-used.

DISPOSAL:

Dispose of any unwanted or expired product at an appropriate disposal facility or suitable landfill. DO NOT use the empty packaging for any other purpose. Dispose of containers to suitable landfill.

LEGAL OBLIGATIONS:

The product must only be used as specified on this label and according to the controls of the HSN0 approval. It is a legal requirement that signs must be posted to notify the public that this product has been applied in the area.
